

# Healthcare Paging

## Patient and Family Paging Systems

### The New Standard in Healthcare Paging for Patients and Families

An HME Wireless healthcare paging system allows for quiet, confidential communication between staff, patients and families to ensure privacy and improve the overall healthcare experience. Our healthcare pagers are compact and convenient, and give patients and family members peace of mind knowing they can be contacted by staff members instantly and discreetly.

HME Wireless' patient and family paging systems encourage patients to sit and relax while they wait for admission, procedures or consultations. Reduces the stress and noise of congested admissions areas and loud overhead systems. Family members are free to wait in comfortable waiting rooms, shop at the gift shop, or have coffee while waiting for loved ones.

QuietCall IQ® helps you to silently and confidentially communicate with patients and family members, resulting in better, higher quality healthcare.

## Healthcare Paging System Highlights

- > **Quality and Innovation**  
The new standard in healthcare paging, more reliable, more durable and more technologically advanced than any system ever designed.
- > **HIPAA-Friendly Communication**  
Ensure patient privacy with silent, confidential paging.
- > **Digital Number System with Auto-Renumbering**  
With the industry's first and only auto-renumbering system, pagers can be renumbered instantly without creating duplicates.
- > **UHF Signal Technology**  
Powerful UHF transmitter guarantees range, even in the largest hospital, clinic or medical office.
- > **Message Insert**  
Communicate important information to patients and families about the facility.
- > **Advanced Pager ID System**  
The only onsite paging system that assures you never have interference from other systems.

### QuietCall IQ
