Everything You Need in a
Paging System and More

“We love the new QuietCall LTD system. Many parents have expressed relief in knowing if they’re needed during church services they can be quietly and discreetly reached.”

— Misty Venable

*Children’s Director,
First Baptist Church*

Church Nursery Paging System Benefits

Improve Nursery Childcare and “First Alert” Response

- > Paging systems promote better church nursery childcare. Parents and guardians can be quickly contacted in any area of the facility whenever needed.
- > Nursery caregivers concentrate on the needs of the children, not on finding parents, ensuring the optimal safety and well-being of the children.
- > Pagers can be used to quickly summon “First Alert” response from onsite doctors, nurses and security personnel.

Congregation Growth Starts with Families

- > Reliable church nursery paging helps meet family needs.
- > Confident in their children’s well-being, parents have peace of mind to fully experience the worship service. Parents are free to move to any room, without fear of missing a page.
- > With no service interruptions the congregation remains undisturbed, while pagers silently alert just the needed parents.

Advertising messages are easily customized with QuietCall LTD's interchangeable insert.

Manage Your Staff More Efficiently

- > Use pagers to quickly and discreetly alert church staff during services and events.
- > Some pager models can be used for daily task scheduling, facilitating a more organized and productive staff.

Your HME Wireless System Advantage

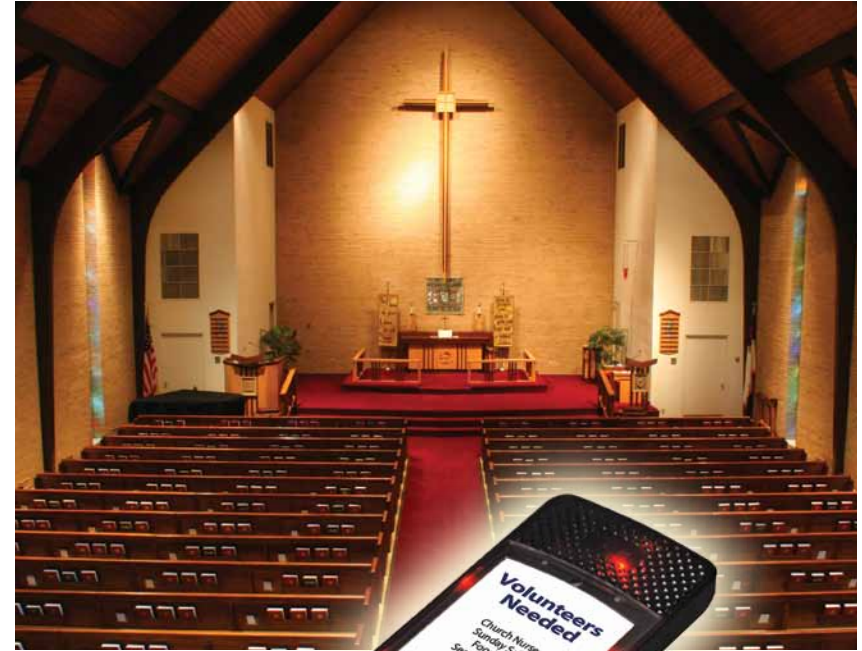

Enjoy Greater Value for Your Investment

Superior value and performance have been the cornerstones of our onsite paging systems since we began in 1995. We are a subsidiary of HME, a nearly 40-year-old technology pioneer, renowned in the quick service restaurant and pro audio industries for high-quality wireless intercom systems.

Systems are tailored to your needs and budget. Our comprehensive product line affords mix and match possibilities to create the complete best paging system for your house of worship.

Built for top-of-the-line durability. High-quality materials and superior workmanship provide maximum reliability and longevity.

Unbeatable product support. We stand behind our product with a three-year warranty and **free 24/7 technical support.**

Experience Our Innovative Technology

- > Small, sleek, ergonomic designs make our pagers easy to carry, resulting in fewer dropped pagers.
- > Menu-driven base station screens are easy to use and navigate.
- > Out-of-range signals alert parents should they start to go too far, ensuring they stay within communication range and preventing lost pagers.
- > An "All-Call Alert" feature saves nursery staff time by simultaneously notifying all parents when it is time to pick up their children.
- > A "Locate" feature makes it quick and easy to locate missing pagers at the push of a button.
- > An up to two-mile communication range makes it possible for parents to roam anywhere on church campus without missing a page.

Easy for Volunteers to Use

- > Systems are ready-to-use right out of the box.
- > No assembly or wiring is required.
- > Simple enough for everyone to use.
- > Instructions are simple and clear to convey to new users.

"The initial set-up of the system was fast and easy and [HME Wireless] service technicians were available to answer any questions."

— **Michelle Hughes**

*Children's Coordinator,
Winter Haven Worship Center*

Choose from a Variety of Pager Models

HME Wireless has a diverse selection of the industry's most innovative rechargeable pagers. Mix and match models from an array of various shapes, sizes and functions to fit your budget and specific needs.

QuietCall LTD™ Pager

Our Most Popular Church Nursery Model

Sleek, ergonomically designed pager with slot for changeable church bulletins and announcements.

QuietCall LTD AIO™

All-In-One Unit

Same functionality as QuietCall LTD, but in a smaller footprint All-In-One (AIO) format. The base station, battery charger and pagers are combined in one piece of equipment that holds up to 15 pagers.

Pager Options

SmartCall™

PLUS Text Messaging with Two Model Options

SmartCall Alpha Numeric Pager Model

Alpha numeric four-line customizable text messaging. Use for daily task scheduling or to notify "First Alert" personnel. Custom messages can be sent from the convenience of your PC.

SmartCall Numeric Pager Model

A more economical way to send text messages. Twelve-character display screen handles up to eight pre-set messages.

Both compact models clip to your belt and are also available with optional paddle for customizable inserts.

CrystalCall® Pager

Two Model Options

CrystalCall Paddle Pager

Paddle includes double-sided slot for church logo and special instructions for parents.

CrystalCall Belt Clip Pager

Compact design clips to your belt.

“We have a large church campus with services in two locations every week. The pagers work anywhere on our campus.”

— Rebekah Potter

*Director of Children’s Ministries,
Jacksonville Chapel*

Frequently Asked Questions (FAQs)

Why use a paging system rather than a digital number board?

Number boards are distracting to other worshippers. Our quiet, personal pagers alert only needed parents. Plus parents can be paged in any part of the facility, not just the room with the number board. Childcare is improved with quick, reliable access to their guardians.

How do I choose the right paging system and the best value?

Compare product quality, special features, ease of use, initial price, operating costs, technical support, and warranty programs. HME Wireless paging systems are made with superior workmanship and the most durable, high-quality materials on the market, providing maximum performance and reliability. Our systems are designed without the use of small or hinged breakable parts to ensure longevity. A wide selection of pagers is offered to fit varying budgets and needs. Our technical support and warranty programs are top notch.

Will an HME Wireless Paging System fit my budget?

With our comprehensive selection of models, shapes, sizes, and features, you can choose the combination best suited to your needs and budget. Compare our innovative options like:

- > Out-of-range alert signaling
- > Customizable messaging
- > Ability to locate missing pagers at the push of a button
- > Phone interconnect feature to page from any phone in the building
- > Special options like task scheduling reminders

Several financing options are available, including "12 months, same as cash."

How difficult and time-consuming is it to set up and operate a new HME Wireless paging system?

Our systems are ready to operate right out of the box, with no programming, assembly or special set-up required. Very simple instructions explain how to start using the system immediately. Little training is needed for staff and volunteers.

FAQs Continued

Within what distance or range do your paging systems operate, and can the range be extended?

Our UHF systems have a range of up to two miles and are ideal for large houses of worship or ones with multiple floor levels. Building structure and materials, along with placement of paging equipment, all affect range so exact coverage is difficult to predict. A simple range test function is built into all of our systems to assist in determining proper coverage. If needed, the range can be extended through the use of repeater technology. Multiple repeaters can be used with paging systems for even greater range.

Will a paging system interfere with our sound system or wireless microphones?

No, wireless microphones operate in a different frequency range than wireless paging systems, thereby preventing interference. HME Wireless guarantees that there will be no interference or they will replace the system with one of another frequency.

How can we prevent the loss of pagers?

An alert notifies users when they start to go out of range. This helps ensure parents receive pages and helps prevent lost pagers. A "Locate" feature makes it easy to find misplaced pagers with the press of a button. The use of a "sign out" and "return" checklist is also suggested.

Can I add on to my paging system later?

As your house of worship grows, add more of the same pagers or other HME Wireless models with advanced features. Our systems are expandable and components can be mixed and matched.

How do I replace the rechargeable batteries?

Our systems use Smart Charging technology which takes about two hours and prevents overcharging, thereby extending the life of the battery up to three to five years. Batteries are simple to replace by the end user. Remove one screw and plug in the new battery – it's that easy. This prevents pager downtime and saves you the added expense of shipping pagers back to the manufacturer.

FAQs Continued

How do I order additional pagers or accessories?

Simply call toll-free 800-925-8091, or use the contact form at www.hmewireless.com.

What kind of ongoing support is provided?
Is it costly?

Technical support is available 24/7 at no charge – even if your product is out of warranty.

What is the warranty for HME Wireless systems?

All HME Wireless church nursery products carry a full three-year warranty, unless otherwise stated.

“We have been using the coaster pagers for the past two years...they hold up to a lot of abuse and are very durable.”

— Sally Holler
