

FOR IMMEDIATE RELEASE

**Pazza Notte brings organization and efficiency to its thriving restaurant scene,
thanks to GuestCall restaurant paging system from HME Wireless**
Lively Manhattan hotspot juggles up to 700-800 guests a day, and a long waitlist every weekend

Atlanta, GA—July 26, 2011—Pazza Notte in New York City is now using GuestCall [restaurant paging](#) from HME Wireless to manage the demands of its burgeoning popularity. The upscale-casual Italian eatery serves up to 800 guests a day, and counts on GuestCall's wait list management to reduce walk-aways and ensure customer-friendly service.

“The organizational aspects of the system have been outstanding,” said restaurant manager Chris Allen. “It really expedites the seating process, and makes our hostess’ and manager’s jobs so much easier.”

Before employing [GuestCall](#) pagers for restaurant, Pazza Notte staff would handwrite the waitlist and then walk around trying to find guests. With a huge central bar and a lounge in the back of the expansive space, Allen admits, “That was not a good process.”

Now the hostess can simply add guests to the waitlist, encourage them to visit the bar, and not worry about finding them quickly. A simple page is all it takes, and the restaurant can turn tables and keep customers satisfied.

Allen gravitated to GuestCall [café pagers](#) because of their widespread recognition with customers, and because the pagers are, quote, “easy to keep track of.” When asked if he would recommend HME [pagers for restaurants](#) to other establishments, Allen replied “absolutely.”

Located on Manhattan’s bustling Avenue of the Americas and known for its tantalizing brick oven pizzas, Pazza Notte owes its success to inventive cuisine and exceptional service; a task now made easier by HME Wireless. “We love to see our solutions in places like Pazza because when you have high volume locations like this only great quality systems can hold up,” commented Russ Ford, Vice President of HME Wireless.
